Arc Workflow

The Future of Network Lifecycle Management

Automate, integrate, and transform your provider operations

Arc Workflow streamlines your provider network management by automating processes and integrating seamlessly with your existing tech stack. No major migrations—just simple, real-time updates across your CRM, databases, analytics tools, and more.

Empower your team to focus on high-level strategy while AI-driven automation handles the manual work. Whether it's CRMs, databases, or customer support systems, Arc Workflow works with the tools you already use, giving you full visibility and control—without the IT bottlenecks:

CRMs

Databases

Analytics tools

Project management software

Customer support systems

Communication platforms

Create high-impact workflows, fast

Build and deploy customized, multi-step workflows in hours—no coding required— automating critical processes and seamlessly integrating with your existing tech stack to enhance accuracy and efficiency.

Seamless System Integration: Connect with your existing tech stack—like CRMs, compliance tools, and provider directories—to enable a unified, streamlined approach with no major tech migration

Real-Time Data Synchronization: Trigger immediate actions based on real-time changes in provider data, ensuring up-to-date information across all systems and enabling faster, informed decision-making

No-Code Custom Workflows: Quickly build tailored workflows with an easy-to-use, no-code interface, supporting multi-step processes and conditional logic to automate complex tasks

Scalable and Adaptive: Grow with your organization, offering scalable automation solutions that evolve alongside your network's expansion and new technologies

Arc Workflow in Action
Solutions for real network challenges

● Tailored workflow automation

Create customized multi-step workflows to automate complex processes, like sending approval emails or flagging issues, using conditional logic to ensure the right actions are taken every time

● Seamless, automated provider data sync

Automatically update provider information in real-time across all systems, including your CRM, ensuring accuracy and consistency without manual intervention

### ● Proactive provider monitoring

Track and respond to changes in provider data, such as sanctions or satisfaction scores, instantly triggering workflows to address potential issues before they impact operations

● Streamlined credentialing updates

Automatically update credentialing statuses across systems like Salesforce based on real-time changes in Andros, speeding up the process and reducing administrative burden

● Automated provider onboarding

Streamline the provider onboarding process by automating tasks like data entry, credentialing updates, and system synchronization, ensuring faster, more efficient onboarding with reduced manual effort

Unlock the future of provider networks

Ready to transform your network?
