Take the hassle out of network approvals

Andros committee support

Network approvals can be one of the most tedious and time-consuming aspects of credentialing. The process is often bogged down with clerical hurdles—preparing files, setting agendas, compiling provider summaries, and ensuring all necessary documentation is ready for review.

At Andros, we take the administrative burden off your shoulders, allowing you to focus on what truly matters: making informed decisions that strengthen your provider network and enhance member care. Let us handle the logistics so you can drive meaningful outcomes with confidence.

Andros classifies providers into three distinct levels based on the results of the credentialing findings and our client’s custom requirements, ensuring the committee can give each provider the in-depth attention required to make an informed decision.
