

Strategic Network Design Services

Expert Solutions for Designing High-Performance Provider Networks

Ensure your network meets regulatory requirements and delivers optimal access and quality for your members. Our Network Design services empower healthcare payers to set clear goals, refine strategies, and plot the fastest path to success.

Provider network development is not a single event. **It's a dynamic lifecycle.**

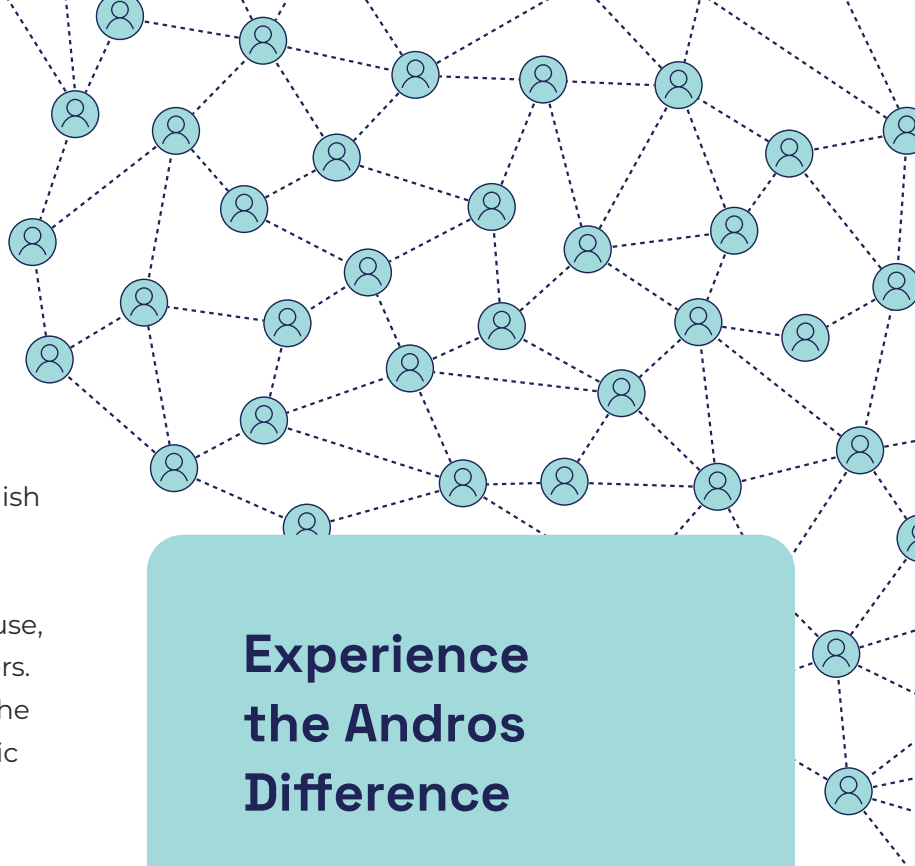

What is Andros Network Design?

Andros Network Design is a strategic service focused on creating provider networks that meet adequacy and access standards. We guide you in setting and refining network goals, plotting efficient pathways to achieve them, and developing comprehensive project plans for network construction.

We help healthcare payers:

- Align network goals with organizational strategies.
- Optimize network efficiency and performance to ensure high-quality care delivery.
- Leverage data-driven insights for informed decision-making in network development.
- Ensure compliance with regulatory standards and industry requirements.
- Facilitate faster market entry and expansion with streamlined project management.

Our Proven Process

Our Network Design service is structured into three streamlined phases, each with clear objectives:

Phase 1

Define Network Goals

In this phase, we work with you to establish the foundation of your network. This includes defining the specialty makeup, determining the best beneficiary file to use, and setting time and distance parameters. The goal is to ensure that all aspects of the network are tailored to meet your specific requirements and standards.

Phase 2

Assess Network Feasibility

We conduct thorough analyses to evaluate the potential network coverage based on different conversion rates. This involves both optimistic (100% conversion) and realistic (10% conversion) scenarios. The objective is to provide a clear understanding of network feasibility and refine goals based on these insights.

Phase 3

Develop Recruitment Strategy

We'll focus on prioritizing provider targets and developing a formal recruitment plan. We perform scenario modeling to understand the impact of various recruitment strategies and provide a detailed plan with key milestones and dates. The aim is to ensure the fastest and most effective path to achieving your network goals.

Experience the Andros Difference

Strategic Goal Setting

We help clients set and refine network goals, ensuring alignment with regulatory standards and unique organizational needs.

Experienced Design Team

Our team has extensive expertise in network design, ensuring precision and strategic planning for optimal outcomes.

Efficient Pathway Planning

Our expertise allows us to plot the most efficient pathway to achieve network goals, optimizing the route to success.

Revolutionize your provider network lifecycle today!
