Automate and Simplify State License Verifications

Simplified Provider Licensing

Navigating state license verifications can be a complex, time-consuming process. Our State License Verification automates and optimizes these essential checks, empowering health plans to manage provider licensing seamlessly. We integrate with your existing workflows, allowing for the efficient import of provider lists, automated verification, and real-time tracking of status updates—all while meeting NCQA standards for compliance.

Maximize Efficiency and Maintain Compliance with Ease

Efficient Data Import
Upload provider lists and corresponding state license information to initiate verification seamlessly.

Automated Verification
Conduct license checks across multiple states to reduce operational bottlenecks and manual errors.

Real-Time Tracking and Reporting
Monitor the status of each request and access comprehensive PDF reports for completed verifications.

Compliance Assurance
Maintain NCQA standards with reliable, documented proof of completed checks.

Experience the Andros Advantage

Dramatically Lower Costs
Achieve an ROI of 300% or more compared to traditional manual credentialing workflows.

Expertise on Your Side
From our roots as CredSimple, we have the experience to ensure you have the support you need every step of the way.

Visibility at Your Convenience
Access comprehensive reports and manage approvals seamlessly in our proprietary platform.

"To move quickly enough to provide our members with the care they deserve while staying compliant – It's essential for us to know, without a doubt, who is credentialed and when. And Andros has consistently offered peace of mind with their reliability."

- Clover Health
