

Proactive Risk Monitoring For Confident Compliance

Spot provider risks before they disrupt care or compliance.

The intelligence behind a safer, stronger network

Risk Monitoring from Andros keeps a pulse on your provider network, scanning for sanctions, exclusions, and license issues that could put patient safety or compliance at risk. With advanced matching logic, audit-ready reporting, and configurable monitoring, Andros gives you the foresight to act fast.

Whether you're building a new network or maintaining an existing one, Risk Monitoring helps you stay ahead of regulatory requirements, meet standards of leading accrediting bodies like NCQA and URAC, and avoid gaps in care delivery with confidence and control.

Precision monitoring, down to the source

Andros monitors your provider network across a comprehensive set of risk signals so you know what's happening and where action is needed.

Sanctions + exclusions monitoring

We monitor all active providers for federal and state sanctions, exclusions, and preclusions, including sources like OIG and state Medicaid lists. Monitoring runs on a cadence that meets the new 2025 NCQA standards, with high-risk sources checked daily.

Smart match resolution

Andros reduces your review burden with sophisticated matching algorithms that resolve high-confidence matches automatically. With the best confirmed match rate in the industry, you get:

- Confirmed issues
- Tentative matches (flagged for review)
- Clean records with no alerts

Audit-ready data

We check high-risk data sources daily and provide source-level detail, monitoring dates, alert history, and evidence files all in one place.

Designed for real-world use, not just reports

Risk monitoring shouldn't create more work, it should help your team focus on what matters. Andros delivers risk data in intuitive formats that support fast decision-making and seamless workflows:

Get the full picture fast

Visual dashboards provide a network-wide view of provider status, with filtering by risk type and severity

Drill down instantly

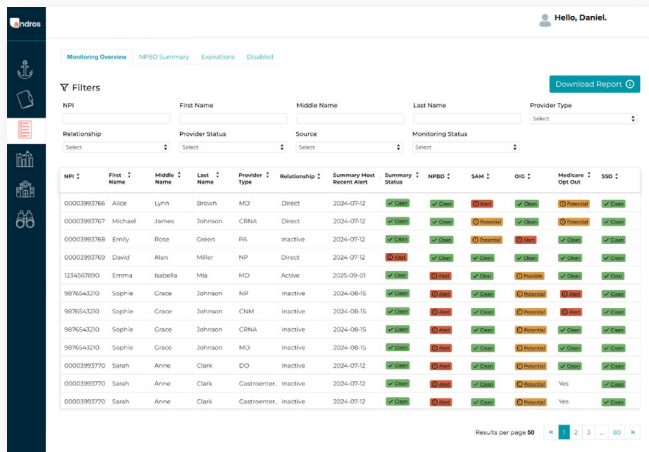

Click into any provider profile to see a full history of alerts, flags, and risk source details

Choose your delivery method

Reports are available via secure CSV export or API—integrate data into your internal system or access on-demand

Support for audit and compliance

Our system captures point-in-time snapshots so you can show exactly what you knew and when

The screenshot shows the Andros Monitoring Overview dashboard. It features a sidebar with navigation icons and a main content area with filters and a data table. The filters include NPI, First Name, Middle Name, Last Name, Relationship, Provider Status, Source, and Monitoring Status. The data table has columns for NPI, First Name, Middle Name, Last Name, Provider Type, Relationship, Summary Next Report Date, Summary Status, NPED, SAM, OIG, Medicare, and SSD. The table lists 15 providers with their respective details and status indicators.

NPI	First Name	Middle Name	Last Name	Provider Type	Relationship	Summary Next Report Date	Summary Status	NPED	SAM	OIG	Medicare	SSD

Enhanced oversight with Expirations Monitoring

Don't let lapses catch you off guard.

Expirations Monitoring tracks provider license expiration dates and flags them in advance, so you have time to intervene before a provider falls out of compliance.

With Expirations Monitoring, your team can stay ahead of renewals, avoid network disruptions, and prioritize provider outreach where it matters most.

Ask us how. info@andros.co

Revolutionize your provider network lifecycle today!
